Q1/18 CAPEX & Investments

Amounted to 9,066 MB in Q1/18, as investments accounted for 40%.

- CAPEX includes debottlenecking, expansion projects, and major turnaround.
 - Investments are acquisitions and purchase of shares (EV basis).

Q1/18 Interest and Finance Costs

Amounted to a total of 1,696 MB, while interest cost was 3.3%.

Highlights:

- Cash & cash under management of 68,299 MB at the end of Q1/18.
- Starting from Q1/18, management has chosen to reflect ‘all service charges’ in reporting business unit’s performance. Previously, only ‘direct service charges’ (e.g., accounting services) had been included while ‘indirect service charges’ (e.g., corporate IT, safety, etc.) had not. All the business units’ EBITDA and Profit numbers for 2017 in this presentation are also adjusted to the same basis.

Outlook:

- FY2018 CAPEX & Investments of approx. 60,000 MB, which includes the LSP chemicals project in Vietnam.
- Full subscription to the Apr 2/18 debenture issuance of 30 Billion Baht (4-yr, 3.0%) which replaced the 30 Billion Baht matured debenture (15 Billion Baht at 4.0% and 15 Billion Baht at 3.75%).

- V. Summary

	Q1/18	Q-o-Q Change	Notes
Crude (Brent)	\$67/bbl	+\$5/bbl (+8%)	Brent price escalated on geopolitical tension in the Middle East and weak U.S. dollar.
Naphtha	\$581/ton	+\$11/ton (+2%)	Naphtha prices rose following crude prices, but upside was capped by limited demand in Asia from more LPG replacement at crackers.
Ethylene	\$1,244/ton	+\$49/ton (+4%)	Ethylene prices positively supported by non-PE derivative demand and limited supply ahead of cracker maintenance season.
Propylene	\$987/ton	+\$159/ton (+19%)	Propylene prices surged on tight supply from several unplanned PDH outages and planned refinery turnarounds.
HDPE	\$1,379/ton	+\$153/ton (+12%)	HDPE film prices increased strongly from reduced supply due to China's coal to gas policy and harsh winter.
PP	\$1,271/ton	+\$76/ton (+6%)	PP prices rose following decreased supply from emergency shutdown due to harsh winter and forced shutdowns of Coal-to-Propylene units in China.
EDC	\$203/ton	\$0/ton (0%)	EDC prices unchanged from Q4 as an emergency shutdown from a Brazilian producer was offset by ample supply in Asia due to high caustic soda prices.
PVC	\$905/ton	+\$28/ton (3%)	PVC prices rose slightly from agricultural demand in India, together with limited PVC supply in NEA from planned maintenance and China's environmental policy.
PVC-EDC/C2	\$453/ton	+\$17/ton (+4%)	PVC-EDC/C2 gap bettered from higher PVC prices while EDC cost remained unmoved.
MMA-Naphtha	\$1,913/ton	+\$31/ton (+2%)	Gap remained strong due to a series of plant turnarounds in Asia.
BD-Naphtha	\$769/ton	+\$247/ton (+47%)	BD spread sharply increased from rising natural rubber prices and a Chinese SBR plant restart from previous unplanned shutdown.
PTA-PX	\$115/ton	+\$22/ton (+23%)	Gap widen from higher PTA prices from more PTA demand due to China's ban of scrap imports.

HDPE-Naphtha Price Gap

HDPE-N gap increased q-o-q on significantly higher HDPE prices from reduced supply and harsh winter, while Naphtha prices were relatively flat.

Polyolefin Sales Volume

Sales volume slightly increased q-o-q, due to strong demand of HDPE and PP, caused by China's environmental policy and limited supply from harsh winter.

PVC Sales Volume

Sales volume increased 3% q-o-q supported by demand recovery in Thailand and healthy agricultural demand in India.

Note: *ASEAN Operations = Sales volume from PVC operations in Vietnam and Indonesia

Revenue from Sales

Q1/18 revenue increased 1,033 MB or +2% q-o-q to 52,867 MB mainly from higher product prices.

EBITDA

EBITDA in Q1/18 dropped due to lower dividend from Associates.

Note: *EBITDA margin excluded sale of investment.

**Please see page 16 for explanation on "service charges".

Profit for the Period

Q1/18 earnings decreased q-o-q, attributed to lower equity income and the Q4/17 gain on investment.

Note: *Sub/Asso: 58% / 42%

**Please see page 16 for details explanation on "service charges"

- **Crude** – Price sets to increase from escalating tension in Middle East and improved demand after end of refinery turnaround.
- **Naphtha** – Naphtha price is expected to rise following crude price.
- **Polyolefin** – PE and PP prices should soften from limited demand during Ramadan and increased supply as plants are returning to normal operations after harsh winter. Although soften demand for polyolefin products, chemical spread still remains healthy.
- **PVC** – Expect price to peak at the end of construction season before soften down by weak Indian market from credit tightening policies.

Investment Highlights:

- **PT Nusantara Polymer Solutions (NPS):** SCG invested in 50% shares in NPS, a newly established plastics trading company for High Value Added (HVA) products in Indonesia.
- **Binh Minh Plastics Joint Stock Company (BMP):** SCG acquired the additional 30.5% shares in BMP, Vietnam. Currently, total stake increased to 50.9%.
